Conditional Approval Letter – Technical Review Board Decision

Document control	
Document ID	CAL-TRB-2026-005
Document type	Conditional Approval Letter
Date	2026-07-29
Status	Active
Review IDs	TRB-2026-005
Feature keys	Genie One@SQL & BI Analytics
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Letter Date: July 29, 2026
To: [Analytics Manager], Analytics Team
From: [CISO], Chief Information Security Officer
Subject: TRB Conditional Approval: Genie One (SQL Query Generator)
Review ID: TRB-2026-005
Decision Record: DR-2026-005

Dear [Analytics Manager]:

On **July 28, 2026**, the Acme Health Plan Technical Review Board (TRB) completed its security and compliance review of **Genie One** (Databricks natural-language SQL generator, GA release).

Decision

Your feature is APPROVED for use at Acme Health Plan, contingent on the documented conditions below.

This approval is valid for use with **PHI-containing member data** (demographics, claims, coverage information) at the scope outlined in your intake request: ad-hoc analytics queries by analytics team members.

Conditions Required Before Deployment

You must **complete and document satisfaction** of each condition below before enabling Genie One for analytics team use. Each condition includes a verification method; the TRB will audit compliance before final go-live approval.

#	Condition ID	Requirement	Verification Method	Owner	Dead-line
1	COND-005-1	**Audit Logging:** All Genie queries logged to system tables with: (1) user, (2) natural-language prompt, (3) generated SQL, (4) result count, (5) timestamp. Logs retained 180 days. Access to prompts restricted to CISO + Compliance Officer. Queries by other users cannot view prompts.	TRB audits system tables; spot-checks 5 logs for completeness. Verifies access controls on audit schema via [system audit].	Analytics Manager + Platform Eng	Sept 15, 2026
2	COND-005-2	**Row-Level Access Control:** Unity Catalog row filters enforced on all member data tables. Genie queries respect row filters (e.g., user with "North Region" role cannot see "South Region" member data). TRB tests with 3 test identities (different roles).	TRB conducts test queries with test user accounts; documents masking applied. Submits test results to Analytics Manager.	Analytics Manager	Sept 15, 2026
3	COND-005-3	**Response Monitoring:** Monthly audit of 10 random Genie queries'	TRB pulls 10 random queries monthly from audit logs.	Databricks Support + Analytics	Monthly starting Oct 1, 2026

#	Condition ID	Requirement	Verification Method	Owner	Dead-line
		results. Suppress results with count < 5 (e.g., do not return "Members with rare diagnosis: 2"). If low-count suppression fails, escalate to CISO. TRB samples will be random, drawn from all Genie queries executed.	Reviews result sets. Flags any low-count data. Escalates to Analytics Manager if suppression missing.		
4	COND-005-4	**User Training:** All analytics team members (5–10 people) complete "Databricks & HIPAA Data Handling" training module before Genie access is granted. Training must include: (a) examples of safe vs. unsafe prompts, (b) HIPAA rules for data handling, (c) incident reporting procedure. Refresher training annually.	Training completion certificates uploaded to [Training Portal]. TRB verifies all authorized users are certified before go-live.	Analytics Manager	Sept 15, 2026

Key Terms & Restrictions

Use Scope

- **Authorized Users:** Analytics team members (list provided: [5-10 names]) with Data Analyst role or higher

- **Data:** PHI-containing member tables (members, claims, coverage) are approved. **NOT approved:** Provider/employee data, financial internal data, or external third-party data
- **Geography:** Data in AWS US-East region only (no cross-region sharing without separate approval)
- **Query Frequency:** Ad-hoc analytics queries; no scheduled automated exports allowed

Compliance Obligations

- **Audit Logging:** All queries automatically logged. TRB has read-only access to audit tables.
- **No Data Export:** Genie results must remain in Databricks workspace. Users cannot export raw result sets to files, email, or external systems. Aggregate reports/dashboards may be distributed after review.
- **User Training:** Annual HIPAA + Databricks security training required for all Genie users. Failure to recertify suspends access until training completed.
- **Incident Reporting:** Any suspected data breach or unauthorized access must be reported to [CISO] within 1 hour.

Monitoring & Re-review

- **Monthly Audit:** TRB will sample 10 random Genie queries and review result sets for privacy concerns (low-count suppression). Results shared with Analytics Manager monthly.
- **Quarterly Report:** Combined audit report sent to CISO + CPO (anomalies, any escalations, trend analysis).
- **Annual Re-review:** TRB will re-assess Genie use annually (July 2027). If monitoring reveals issues (e.g., >2 low-count failures, >1 unauthorized prompt disclosures), full re-review may be required.
- **Policy Change Trigger:** If Acme Health Plan security policy changes (e.g., new PHI minimization requirements), TRB may require re-assessment.

Next Steps

1. Acknowledge Receipt (You)

Reply to this letter within **5 business days** (by August 5, 2026) confirming:
- Receipt of this letter and conditions

- Commitment to execute all conditions by Sept 15 deadline
- Authorization to proceed with training and system configuration

2. Complete Conditions (You)

Execute each condition by the deadline (Sept 15, 2026):

COND-005-1 (Audit Logging):
- Enable query audit logging in Databricks for Genie (workspace config)
- Verify prompts are captured; test with sample query
- Restrict prompt access to [CISO email], [Compliance Officer email]
- Submit evidence: Screenshots of system tables showing sample logs + access control settings

COND-005-2 (Row-Level Filtering):
- Verify UC row filters are enabled on members, claims, coverage tables
- Coordinate with TRB for test queries (TRB will provide test identities)
- Document test results: [3 test users], [queries run], [results masked as expected]
- Submit evidence: Test query results + access control policy documentation

COND-005-3 (Response Monitoring):
- Coordinate with Databricks support to ensure audit logs are accessible to TRB
- Confirm log retention period is ≥180 days
- Submit evidence: Databricks configuration showing log location + retention

COND-005-4 (User Training):
- Assign all analytics team members to training module (URL: [Training Portal])
- Collect completion certificates
- Submit: List of users + completion certificates by Sept 15

3. Condition Verification (TRB)

Upon your submission (by Sept 15), the TRB lead will audit the evidence within 5 business days. You will receive a **Verification Report** documenting:
- ✓ Verified (condition met)
- ⚠ Partial (condition mostly met; minor gaps noted)
- ✗ Not Verified (condition not met; additional work required)

If any condition is not verified, you will have 5 additional business days to address gaps.

4. Go-Live (You)

Deploy Genie One only after receiving written confirmation that ALL conditions are verified. This confirmation will come from [CISO] or [TRB Lead] with subject line "TRB-2026-005 Conditions Verified – Go-Live Approved."

Timeline:
- Sept 15: Conditions submission deadline
- Sept 22: TRB verification complete
- Sept 23: Go-live confirmation issued (if all conditions verified)
- Sept 24: Genie One enabled for analytics team use

5. Ongoing Monitoring (TRB)

After go-live, TRB will:
- **Monthly:** Sample 10 random Genie queries; review results for privacy (see COND-005-3)
- **Monthly:** Escalate any concerning queries to Analytics Manager + CISO
- **Quarterly:** Report summary to CISO + CPO (anomalies, trends, user feedback)
- **Annually (July 2027):** Conduct re-review to assess whether conditions remain appropriate

---

Conditions Tracker

A real-time tracker is maintained at: **[Acme Health Plan Wiki / Confluence]**
URL: `https://wiki.acmehealthplan.com/trb/conditions/TRB-2026-005`
Access: Analytics team + TRB board members

Sections:
- Executive summary
- Condition status (Open / In Progress / Verified)
- Verification evidence (links to docs)
- Audit findings (monthly samples)
- Q&A / issues

Questions or Issues?

- **Conditions Clarification:** Contact [Enterprise Architect] at [email] or [Slack channel #trb-questions]
- **Training Support:** Contact [HR/Training] at [training@acmehealthplan.com]
- **Timeline Extension:** Email CISO before Sept 15 deadline with justification. TRB may grant **one 2-week extension** if progress demonstrated.
- **Technical Issues (Databricks):** Contact Databricks support directly; CC [Platform Eng Lead] for coordination

- **Appeal / Waiver:** If you believe a condition is infeasible, submit written appeal to [CISO] by Sept 1 with alternative mitigation proposal. TRB will vote on waiver request.

Compliance & Retention

This letter and all condition verification documentation will be retained for **7 years** per [Compliance Policy POLICY-2024-RETENTION] and made available to:
- **Annual IT audit:** TRB audit findings reviewed annually
- **HIPAA OCR audit:** If requested by HHS Office for Civil Rights, all TRB decisions, conditions, and monitoring records provided
- **Internal incident investigation:** If data breach occurs, all Genie query logs and TRB audit records preserved for investigation
