Decision Record: Reject Kafka Connector (Beta)

Document control	
Document ID	DR-2026-004
Document type	Decision Record
Date	2026-07-14
Status	Rejected
Review IDs	TRB-2026-004
Feature keys	Kafka-compatible APIs@Ingestion
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Feature: Kafka-compatible APIs
Status: Rejected
Date: July 14, 2026
Phase: Beta

Decision

REJECTED. Feature is in Beta. Per TRB charter, Beta features are out of compliance scope (no SLA). Streaming audit trail not yet proven. Row-level filtering unavailable. Resubmit at GA.

Rationale

- Beta is not production-grade for PHI
- Audit replay for streaming is complex and untested
- No row-level filtering capability yet

Path Forward

Resubmit when Databricks reaches GA with row-level filtering support and enhanced audit capabilities.

Rejected By: [CISO] — Date: July 14, 2026

Classification: Internal – Synthetic Sample
