Feature keys	Mode: Databricks-to-Open (bearer/OIDC)@Sharing & Collaboration
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Feature: Mode: Databricks-to-Open (bearer/OIDC sharing)
Status: Accepted (Approved with Conditions)
Date: August 25, 2026
Phase: GA

Decision

APPROVED for Non-PHI external sharing. Conditions: COND-007-1 (BAA required), COND-007-2 (token controls), COND-007-3 (audit logs). PHI sharing requires BAA + conditions verified.

Conditions

ID	Requirement	Deadline
COND-007-1	BAA signed before share	Per engagement
COND-007-2	Token ≤30 days; IP allowlist	2026-10-25
COND-007-3	Audit logs (180 days); monthly review	2026-10-25

Rationale

Bearer token risk mitigated by short lifetime, IP allowlist, and monthly audit. BAA requirement ensures recipient accountability.

Approved By: [CISO] — Date: August 25, 2026

Classification: Internal – Synthetic Sample
