Document type	Decision Record
Date	2026-05-05
Status	Accepted
Meeting	TRBM-2026-05-05
Review IDs	TRB-2026-010
Feature keys	Unity Catalog@Platform & Governance
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Status: Approved · **Approved scope:** PHI · **Decided at:** TRBM-2026-05-05
Review: TRB-2026-010 · **Feature:** `Unity Catalog@Platform & Governance` ·
Databricks phase at decision: GA

Context

Enterprise Data Platform submitted UC as the foundational governance layer for the lakehouse. The TRB evaluated whether the metastore design and cross-region limitations meet the payer's multi-workspace governance model.

Decision

UC is approved as the payer's single governance layer over all catalogs and PHI. The metastore region limitation is accepted as tolerable; cross-region PHI access will use Delta Sharing with explicit approvals.

Risks considered

- Metastore region lock-in limits disaster recovery
- Cross-catalog access complexity
- Admin burden for large permission matrices

Mitigations relied on

- Delta Sharing used for cross-region workloads
- Governance Hub provides centralized policy console
- Role-based access templates for common personas

Control mappings

- HIPAA-Security-Rule 164.312(a)(2)(i) (Unique user identification): Satisfied
- NIST-800-53-R5 AC-2 (Account Management): Satisfied
- HITRUST-CSF 01.a (Information and Asset Management): Satisfied
