Decision Record DR-2026-011: Audit logs

Document control	
Document ID	DR-2026-011
Document type	Decision Record
Date	2026-05-05
Status	Accepted
Meeting	TRBM-2026-05-05
Review IDs	TRB-2026-011
Feature keys	Audit logs@Platform & Governance
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Status: Approved · **Approved scope:** PHI · **Decided at:** TRBM-2026-05-05
Review: TRB-2026-011 · **Feature:** `Audit logs@Platform & Governance` · **Databricks phase at decision:** GA

Context

Information Security presented UC audit logs as the immutable evidence source for HIPAA and SOC 2 audits. Retention, tamper-proof storage, and query performance were evaluated.

Decision

Audit logs are approved as the payer's audit source. Retention follows the enterprise records-retention policy (7 years), implemented by the platform team through audit-log delivery and system-table exports; all production workspaces must deliver audit logs.

Risks considered

- Log volume for high-scale environments

- Query complexity for forensics
- Long-term retention cost

Mitigations relied on

- Audit logs stored in managed UC tables with VACUUM restrictions
- System tables provide efficient log queries
- Tiered retention policy: hot 90 days, cold 7 years

Control mappings

- HIPAA-Security-Rule 164.312(b) (Audit controls): Satisfied
- NIST-800-53-R5 AU-2 (Audit Events): Satisfied
- HITRUST-CSF 02.e (Protection of Audit Information): Satisfied

Re-review
