Decision Record DR-2026-015: Lakeflow Jobs (Workflows)

Document control	
Document ID	DR-2026-015
Document type	Decision Record
Date	2026-06-02
Status	Accepted
Meeting	TRBM-2026-06-02
Review IDs	TRB-2026-015
Feature keys	Lakeflow Jobs (Workflows)@Pipelines & Data Engineering
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Status: Approved · **Approved scope:** PHI · **Decided at:** TRBM-2026-06-02
Review: TRB-2026-015 · **Feature:** `Lakeflow Jobs (Workflows)@Pipelines & Data Engineering` · **Databricks phase at decision:** GA

Context

Claims Operations and Finance jointly submitted Workflows (Lakeflow Jobs) as the enterprise orchestration engine. TRB evaluated task types, error handling, and audit logging.

Decision

Workflows is approved as the enterprise standard for all scheduled and multi-step workloads. All production claims, eligibility, and reporting jobs must use Workflows.

Risks considered

- Job dependencies not captured if manual coordination still used

- Timeout handling for long-running claims joins
- Audit trail for task-level retries

Mitigations relied on

- Job DAG enforces explicit task dependencies
- Timeout limits configured per task type
- Each task execution logged to audit tables

Control mappings

- HIPAA-Security-Rule 164.312(a)(2)(iii) (Logging and monitoring): Satisfied
- NIST-800-53-R5 AU-12 (Audit Record Generation): Satisfied
- HITRUST-CSF 10.e (System Monitoring): Satisfied
