Decision Record DR-2026-019: AI/BI Dashboards

Document control	
Document ID	DR-2026-019
Document type	Decision Record
Date	2026-06-16
Status	Accepted
Meeting	TRBM-2026-06-16
Review IDs	TRB-2026-019
Feature keys	AI/BI Dashboards@SQL & BI Analytics
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Status: Approved · **Approved scope:** PHI · **Decided at:** TRBM-2026-06-16
Review: TRB-2026-019 · **Feature:** `AI/BI Dashboards@SQL & BI Analytics` ·
Databricks phase at decision: GA

Context

Analytics Operations submitted AI/BI Dashboards for internal governance and reporting. TRB evaluated row/column filter enforcement in dashboards and viewer access controls.

Decision

AI/BI Dashboards are approved for internal governance and reporting with PHI filters. Dashboards must be built on UC tables with row/column masks enabled.

Risks considered

- Filters not reapplied after refresh

- Viewer impersonation leaks cross-team data
- Cache stale PHI

Mitigations relied on

- Filters re-evaluated on each refresh
- Viewer access uses UC identities, no impersonation
- Cache TTL set to 15 minutes for PHI dashboards

Control mappings

- HIPAA-Security-Rule 164.312(a)(2)(i) (Unique user identification): Satisfied
- NIST-800-53-R5 AC-2 (Account Management): Satisfied
- HITRUST-CSF 08.b (Audit and Accountability): Satisfied
