Decision Record DR-2026-021: MLflow

Document control	
Document ID	DR-2026-021
Document type	Decision Record
Date	2026-06-16
Status	Accepted
Meeting	TRBM-2026-06-16
Review IDs	TRB-2026-021
Feature keys	MLflow@AI / ML
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Status: Approved · **Approved scope:** PHI · **Decided at:** TRBM-2026-06-16
Review: TRB-2026-021 · **Feature:** `MLflow@AI / ML` · **Databricks phase at decision:** GA

Context

Research & Innovation selected MLflow as the system of record for ML model lifecycle (training, versioning, governance). TRB reviewed experiment tracking, parameter audit, and model promotion controls.

Decision

MLflow is approved as the enterprise model registry and lifecycle system. All trained models must be logged to MLflow; promotion to production requires model-card sign-off.

Risks considered

- Training data lineage not captured
- Model artifact storage not versioned

- Parameter drift across training runs

Mitigations relied on

- MLflow experiments linked to UC tables via lineage
- Model artifacts stored in UC volumes with versioning
- Parameter comparison provided in MLflow UI

Control mappings

- HIPAA-Security-Rule 164.308(a)(3)(ii)(B) (Workforce security): Satisfied
- NIST-800-53-R5 CM-9 (Configuration Management Plan): Satisfied
- HITRUST-CSF 09.c (Change Management): Satisfied

Re-review
