Document ID	DR-2026-032
Document type	Decision Record
Date	2026-05-19
Status	Accepted
Meeting	TRBM-2026-05-19
Review IDs	TRB-2026-032
Feature keys	Databricks CLI@Apps & Developer Tools
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Status: Approved · **Approved scope:** PHI · **Decided at:** TRBM-2026-05-19
Review: TRB-2026-032 · **Feature:** `Databricks CLI@Apps & Developer Tools` ·
Databricks phase at decision: GA

Context

Enterprise Data Platform submitted Databricks CLI for automation and this tracker's weekly refresh workflow. TRB reviewed credential handling and audit logging.

Decision

The Databricks CLI is approved for platform-team tooling and automation. CLI is restricted to service-principal identities. Human API tokens are discouraged.

Risks considered

- API token lifetime and rotation
- CLI audit trail sparse vs. web console

- Token compromise in CI/CD pipelines

Mitigations relied on

- API tokens limited to service principals with short TTL
- CLI calls logged via audit tables
- GitHub Actions tokens use temporary credentials

Control mappings

- HIPAA-Security-Rule 164.312(a)(2)(i) (Unique user identification): Satisfied
- NIST-800-53-R5 AC-2 (Account Management): Satisfied
- HITRUST-CSF 05.a (Access Control): Satisfied
