Feature keys	Unity Catalog@Platform & Governance
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-010 · **Feature:** `Unity Catalog@Platform & Governance` ·
Databricks phase at submission: GA
Requesting business unit: Enterprise Data Platform · **Submitted:** 2026-04-16 ·
Scheduled for: TRBM-2026-05-05
Primary reviewer: Data Governance Lead

Business need

Enterprise Data Platform submitted UC as the foundational governance layer for the lakehouse. The TRB evaluated whether the metastore design and cross-region limitations meet the payer's multi-workspace governance model.

Intended use cases

- Enterprise governance
- Cross-workspace lineage
- Unified access control

Risks identified by the requester

- Metastore region lock-in limits disaster recovery
- Cross-catalog access complexity
- Admin burden for large permission matrices

Proposed mitigations

- Delta Sharing used for cross-region workloads
- Governance Hub provides centralized policy console
- Role-based access templates for common personas

Reference

- Databricks documentation: https://docs.databricks.com/aws/en/data-governance/unity-catalog/
- Known limitations (tracker): Metastore is region-scoped; cross-region needs Delta Sharing.
