Date	2026-04-18
Status	Submitted
Meeting	TRBM-2026-05-05
Review IDs	TRB-2026-011
Feature keys	Audit logs@Platform & Governance
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-011 · **Feature:** `Audit logs@Platform & Governance` · **Databricks phase at submission:** GA
Requesting business unit: Information Security · **Submitted:** 2026-04-18 · **Scheduled for:** TRBM-2026-05-05
Primary reviewer: CISO

Business need

Information Security presented UC audit logs as the immutable evidence source for HIPAA and SOC 2 audits. Retention, tamper-proof storage, and query performance were evaluated.

Intended use cases

- Audit trail for compliance
- Breach-impact investigations
- User activity tracking

Risks identified by the requester

- Log volume for high-scale environments
- Query complexity for forensics
- Long-term retention cost

Proposed mitigations

- Audit logs stored in managed UC tables with VACUUM restrictions
- System tables provide efficient log queries
- Tiered retention policy: hot 90 days, cold 7 years
