Meeting	TRBM-2026-10-06
Review IDs	TRB-2026-012
Feature keys	Salesforce@Ingestion
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-012 · **Feature:** `Salesforce@Ingestion` · **Databricks phase at submission:** GA
Requesting business unit: Member Experience · **Submitted:** 2026-09-17 · **Scheduled for:** TRBM-2026-10-06
Primary reviewer: Chief Privacy Officer

Business need

Member Experience submitted the Salesforce connector (Lakeflow Connect) to sync Health Cloud and Service Cloud member and case data for a 360-degree member view. TRB is reviewing OAuth scope and PII field mapping to ensure minimum-necessary extraction.

Intended use cases

- Member 360 golden record
- Care team CRM sync
- Case management analytics

Risks identified by the requester

- Overly broad OAuth scope pulls unnecessary PII
- Case comments may contain sensitive clinical notes
- CRM deletion/archival timing vs. lakehouse retention

Proposed mitigations

- OAuth scopes limited to standard Health Cloud objects
- PII field mapping reviewed per data dictionary
- Case comment fields excluded from initial sync
