Document ID	INT-TRB-2026-014
Document type	Review Intake Request
Date	2026-05-15
Status	Submitted
Meeting	TRBM-2026-06-02
Review IDs	TRB-2026-014
Feature keys	Lakeflow Declarative Pipelines (DLT)@Pipelines & Data Engineering
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-014 · **Feature:** `Lakeflow Declarative Pipelines (DLT)@Pipelines & Data Engineering` · **Databricks phase at submission:** GA
Requesting business unit: Claims Operations · **Submitted:** 2026-05-15 · **Scheduled for:** TRBM-2026-06-02
Primary reviewer: Platform Engineering Lead

Business need

Claims Operations proposed DLT as the standard for building medallion (bronze/silver/gold) pipelines. TRB reviewed data-quality expectations, SCD handling, and audit capabilities.

Intended use cases

- Claims medallion curation
- Quality expectations enforcement
- Member identity matching

Risks identified by the requester

- Expectation failures hide data-quality issues if quarantine not monitored
- SCD Type 2 complexity for member history
- Pipeline dependencies not visible in lineage

Proposed mitigations

- Expectations route bad rows to quarantine tables with alerts
- APPLY CHANGES handles SCD Type 2 natively
- DLT lineage integrates with UC governance hub
