Review IDs	TRB-2026-016
Feature keys	Delta Lake@Storage & Formats
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-016 · **Feature:** `Delta Lake@Storage & Formats` · **Databricks phase at submission:** GA
Requesting business unit: Enterprise Data Platform · **Submitted:** 2026-05-28 · **Scheduled for:** TRBM-2026-06-16
Primary reviewer: Enterprise Architect

Business need

Enterprise Data Platform designated Delta as the default table format for all PHI workloads. TRB reviewed ACID guarantees, time-travel retention, and interoperability.

Intended use cases

- All claims and member storage
- Time travel for audit and recovery
- ACID upserts for incremental updates

Risks identified by the requester

- Time-travel retention increases storage cost

- Format lock-in vs. open formats
- Upgrade complexity for large tables

Proposed mitigations

- VACUUM policy: 180-day retention for PHI, 30 days for analytics
- Iceberg interoperability via UniForm
- Delta version checks automated in CI/CD
