Feature keys	Lakebase (Postgres OLTP)@Storage & Formats
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-017 · **Feature:** `Lakebase (Postgres OLTP)@Storage & Formats` · **Databricks phase at submission:** GA
Requesting business unit: Member Experience · **Submitted:** 2026-09-19 · **Scheduled for:** TRBM-2026-10-06
Primary reviewer: Chief Privacy Officer

Business need

Member Experience submitted Lakebase (managed Postgres OLTP) for powering member-facing apps with low-latency serving next to the lakehouse. TRB is reviewing backup/recovery, retention, and PHI-at-rest encryption.

Intended use cases

- Member portal app backing store
- Low-latency care-team reference data
- Operational app transactions

Risks identified by the requester

- Automatic backups may retain deleted PHI
- Retention policy not aligned to HIPAA 6-year minimum
- CMK coverage for Postgres storage

Proposed mitigations

- Backup retention tuned to 7-year hold period
- Automated backup lifecycle per retention policy
- CMK applied to all Postgres instances
