Meeting	TRBM-2026-06-16
Review IDs	TRB-2026-019
Feature keys	AI/BI Dashboards@SQL & BI Analytics
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-019 · **Feature:** `AI/BI Dashboards@SQL & BI Analytics` ·
Databricks phase at submission: GA
Requesting business unit: Analytics Operations · **Submitted:** 2026-05-30 ·
Scheduled for: TRBM-2026-06-16
Primary reviewer: Data Governance Lead

Business need

Analytics Operations submitted AI/BI Dashboards for internal governance and reporting. TRB evaluated row/column filter enforcement in dashboards and viewer access controls.

Intended use cases

- Executive dashboards with HEDIS/STARS metrics
- Quality-measure tracking
- Member cohort analysis

Risks identified by the requester

- Filters not reapplied after refresh
- Viewer impersonation leaks cross-team data
- Cache stale PHI

Proposed mitigations

- Filters re-evaluated on each refresh
- Viewer access uses UC identities, no impersonation
- Cache TTL set to 15 minutes for PHI dashboards

Reference

- Databricks documentation: https://docs.databricks.com/aws/en/dashboards/
- Known limitations (tracker): none recorded
