Date	2026-09-20
Status	Submitted
Meeting	TRBM-2026-10-06
Review IDs	TRB-2026-020
Feature keys	AI/BI Genie@SQL & BI Analytics
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-020 · **Feature:** `AI/BI Genie@SQL & BI Analytics` · **Databricks phase at submission:** GA
Requesting business unit: Analytics Operations · **Submitted:** 2026-09-20 · **Scheduled for:** TRBM-2026-10-06
Primary reviewer: Chief Privacy Officer

Business need

Analytics Operations submitted AI/BI Genie (natural-language Q&A) as an umbrella review for analyst self-serve access to PHI. Genie One (TRB-2026-005) is an existing approved use case. TRB is evaluating whether UC row/column masks and filters are proven to hold in Genie-generated SQL.

Intended use cases

- Analyst self-serve Q&A over PHI
- HEDIS/STARS metric queries
- Ad-hoc member cohort analysis

Risks identified by the requester

- Generated SQL bypasses row/column filters
- LLM prompt injection exposes schema or data
- Genie answer cache leaks PHI between users

Proposed mitigations

- Genie SQL generation goes through UC masking validation
- User prompt validation and sanitization before LLM
- Query result cache isolated per user with TTL
