Document type	Review Intake Request
Date	2026-05-31
Status	Submitted
Meeting	TRBM-2026-06-16
Review IDs	TRB-2026-021
Feature keys	MLflow@AI / ML
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-021 · **Feature:** `MLflow@AI / ML` · **Databricks phase at submission:** GA
Requesting business unit: Research & Innovation · **Submitted:** 2026-05-31 · **Scheduled for:** TRBM-2026-06-16
Primary reviewer: Platform Engineering Lead

Business need

Research & Innovation selected MLflow as the system of record for ML model lifecycle (training, versioning, governance). TRB reviewed experiment tracking, parameter audit, and model promotion controls.

Intended use cases

- Risk and readmission model training
- Model versioning and governance
- Production model promotion

Risks identified by the requester

- Training data lineage not captured
- Model artifact storage not versioned
- Parameter drift across training runs

Proposed mitigations

- MLflow experiments linked to UC tables via lineage
- Model artifacts stored in UC volumes with versioning
- Parameter comparison provided in MLflow UI

Reference

- Databricks documentation: https://docs.databricks.com/aws/en/mlflow/
- Known limitations (tracker): none recorded
