Document ID	INT-TRB-2026-030
Document type	Review Intake Request
Date	2026-05-09
Status	Submitted
Meeting	TRBM-2026-05-19
Review IDs	TRB-2026-030
Feature keys	Enhanced Security Monitoring@Security & Networking
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-030 · **Feature:** `Enhanced Security Monitoring@Security & Networking` · **Databricks phase at submission:** GA
Requesting business unit: Information Security · **Submitted:** 2026-05-09 · **Scheduled for:** TRBM-2026-05-19
Primary reviewer: CISO

Business need

Information Security selected Enhanced Security Monitoring (ESM) to add malware, file-integrity, and vulnerability monitoring on compute handling PHI. TRB reviewed agent overhead and alert handling.

Intended use cases

- Malware detection on compute
- File integrity monitoring
- Vulnerability scanning for patches

Risks identified by the requester

- Monitoring agent impacts cluster performance
- False positives overwhelm security team
- Classic-compute-only limitation

Proposed mitigations

- Agent overhead <5% CPU; tuned sampling rates
- Alert thresholds and allowlists reduce false positives
- Serverless compute ESM roadmap exists but not yet approved

Reference

- Databricks documentation: https://docs.databricks.com/aws/en/security/privacy/enhanced-security-monitoring.html
- Known limitations (tracker): Classic compute only.
