Feature keys	Databricks CLI@Apps & Developer Tools
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-032 · **Feature:** `Databricks CLI@Apps & Developer Tools` ·
Databricks phase at submission: GA
Requesting business unit: Enterprise Data Platform · **Submitted:** 2026-05-10 ·
Scheduled for: TRBM-2026-05-19
Primary reviewer: Platform Engineering Lead

Business need

Enterprise Data Platform submitted Databricks CLI for automation and this tracker's weekly refresh workflow. TRB reviewed credential handling and audit logging.

Intended use cases

- Scriptable platform automation
- This feature tracker weekly refresh job
- Infrastructure-as-code tooling

Risks identified by the requester

- API token lifetime and rotation

- CLI audit trail sparse vs. web console
- Token compromise in CI/CD pipelines

Proposed mitigations

- API tokens limited to service principals with short TTL
- CLI calls logged via audit tables
- GitHub Actions tokens use temporary credentials

Reference

- Databricks documentation: https://docs.databricks.com/aws/en/dev-tools/cli/
- Known limitations (tracker): none recorded
