Feature keys	Asset Bundles (DABs)@Apps & Developer Tools
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-033 · **Feature:** `Asset Bundles (DABs)@Apps & Developer Tools` · **Databricks phase at submission:** GA
Requesting business unit: Enterprise Data Platform · **Submitted:** 2026-05-11 · **Scheduled for:** TRBM-2026-05-19
Primary reviewer: Enterprise Architect

Business need

Enterprise Data Platform selected Asset Bundles (DABs) as the enterprise deployment standard for jobs, pipelines, and apps. TRB reviewed version control integration and rollback procedures.

Intended use cases

- Versioned job and pipeline deployment
- Repeatable infrastructure-as-code releases
- Audit trail of infrastructure changes

Risks identified by the requester

- DAB validation doesn't catch breaking changes
- Rollback complexity for large bundles
- Production deployment coordination

Proposed mitigations

- DAB syntax validation in pre-commit hooks
- Automated rollback via Git revert
- Deployment windows scheduled weekly
