Meeting	TRBM-2026-06-16
Review IDs	TRB-2026-034
Feature keys	Serverless compute@Compute
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Review ID: TRB-2026-034 · **Feature:** `Serverless compute@Compute` · **Databricks phase at submission:** GA
Requesting business unit: Finance · **Submitted:** 2026-05-27 · **Scheduled for:** TRBM-2026-06-16
Primary reviewer: Enterprise Architect

Business need

Finance selected Serverless Compute to reduce idle costs for bursty claims and reporting jobs. TRB is approving with conditions on compliance security profile validation and cost attribution.

Intended use cases

- Elastic batch processing for claims jobs
- Cost optimization for bursty workloads
- Instant compute for on-demand queries

Risks identified by the requester

- Compliance security profile not available on serverless
- Cost spikes from unlimited autoscaling
- Multi-tenant noisy-neighbor performance

Proposed mitigations

- Compliance security profile roadmap confirms PHI support Q4 2026
- Spend controls via serverless job capacity reservations
- Isolated pools for high-priority workloads
