Document ID	MIN-TRBM-2026-04-21
Document type	Meeting Minutes
Date	2026-04-21
Status	Final
Meeting	TRBM-2026-04-21
Review IDs	TRB-2026-025, TRB-2026-026, TRB-2026-027, TRB-2026-028
Feature keys	Secure Cluster Connectivity (NPIP)@Security & Networking; PrivateLink (front-end & back-end)@Security & Networking; Customer-managed keys (CMK)@Security & Networking; Compliance security profile@Security & Networking
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Attendees: CISO, Chief Privacy Officer, Enterprise Architect, Platform Engineering Lead, Data Governance Lead, Compliance Officer · **Quorum:** met · **Format:** hybrid

Decisions and introductions

TRB-2026-025: Secure Cluster Connectivity (NPIP) → Approved (scope: PHI)

Presented by Information Security; lead reviewer CISO.

Secure Cluster Connectivity is approved and required for all production PHI workloads. All production clusters must have public IPs disabled.

TRB-2026-026: PrivateLink (front-end & back-end) → Approved (scope: PHI)

Presented by Information Security; lead reviewer CISO.

PrivateLink is approved as a core requirement for the payer's PHI environment. Dual PrivateLink (front and back) is required for production PHI. Single PrivateLink is acceptable for non-PHI analytics.

TRB-2026-027: Customer-managed keys (CMK) → Approved (scope: PHI)

Presented by Information Security; lead reviewer CISO.

Customer-managed keys are approved and required for all PHI data at rest. Encryption must use CMK; AWS default keys are not acceptable for PHI.

TRB-2026-028: Compliance security profile → Approved (scope: PHI)

Presented by Information Security; lead reviewer Compliance Officer.

The Compliance Security Profile is approved and required for all PHI workloads. Once enabled on a workspace, it cannot be disabled. All production PHI workspaces must have CSP enabled.
