TRB Meeting Minutes – September 22, 2026

Document control	
Document ID	MIN-TRBM-2026-09-22
Document type	Meeting Minutes
Date	2026-09-22
Status	Final
Meeting	TRBM-2026-09-22
Review IDs	TRB-2026-009
Feature keys	MCP servers@Generative AI & Agents
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Meeting ID: TRBM-2026-09-22
Date: September 22, 2026
Time: 10:00–10:30 AM ET
Quorum: ✓ Yes (8/8 present)

Agenda

1. TRB-2026-009: MCP Servers (Generative AI & Agents)

Requestor: [Enterprise Architect]
Databricks Phase: GA
Review Status: Intake Submitted (Not Yet Reviewed)

Presentation Summary: Model Context Protocol (MCP) is a new Databricks capability enabling agents to interact with external tools/APIs via standardized interfaces. MCP servers are integrations (e.g., external APIs, web services). Acme Health Plan is interested in connecting MCP servers for clinical decision support (e.g., look up drug

interactions from FDA API, retrieve member insurance eligibility from internal claims system).

Intake Status: Intake form submitted 2026-09-22 (deadline met). Requestor present to clarify scope and preliminary risk factors.

Preliminary Questions:
- **CISO:** "Which MCP servers are being proposed?" → **Answer:** 2 initial servers: (1) External FDA drug interaction API (read-only); (2) Internal claims system for eligibility lookup (read-only, limited to member ID + plan info).
- **CPO:** "Does an agent using MCP servers generate audit logs?" → **Answer:** Databricks logs agent interactions; external API calls may not be logged by Databricks. Requestor will need to audit at the endpoint.
- **Enterprise Architect:** "What if an MCP server is compromised?" → **Answer:** Could expose queries or responses. TRB needs risk assessment on each MCP server before approval.

Board Decision: 🔄 **NOT REVIEWED → UNDER REVIEW (Intake Accepted)**

Next Steps:
- Risk assessment to be completed by [Enterprise Architect] by 2026-10-20
- TRB meeting scheduled: TRBM-2026-10-09 for full review
- Requestor to provide documentation on each MCP server (authentication, data flows, error handling, privacy implications)

Monitoring Plan: Once approved, each MCP server integration will require separate risk assessment and approval before it's connected to production agents.

Administrative Items

Upcoming Reviews (Next Quarter)

- TRBM-2026-10-09: TRB-2026-009 (MCP) full review (expected)
- TRBM-2026-11-24: TRB-2026-006 (Knowledge Assistant) re-review (pilot sandbox expires)

Next Meeting

Date: October 9, 2026 (if needed for MCP review), or October 23, 2026 (regular cadence)

Approved By: [CISO] — Date: September 26, 2026

Classification: Internal – Synthetic Sample
