TRB Meeting Minutes: 2026-10-06 (Regular session)

Document control	
Document ID	MIN-TRBM-2026-10-06
Document type	Meeting Minutes
Date	2026-10-06
Status	Final
Meeting	TRBM-2026-10-06
Review IDs	TRB-2026-005, TRB-2026-009, TRB-2026-012, TRB-2026-017, TRB-2026-020, TRB-2026-022, TRB-2026-023, TRB-2026-024, TRB-2026-034
Feature keys	TRB-2026-005; TRB-2026-009; Salesforce@Ingestion; Lakebase (Postgres OLTP)@Storage & Formats; AI/BI Genie@SQL & BI Analytics; Model Serving@AI / ML; AI Functions (SQL)@Generative AI & Agents; Clean Rooms@Sharing & Collaboration; Serverless compute@Compute
Classification	Internal – Synthetic Sample

> Acme Health Plan is fictional. This is a synthetic sample document for the Databricks Feature Tracker.

Attendees: CISO, Chief Privacy Officer, Enterprise Architect, Platform Engineering Lead, Data Governance Lead, Compliance Officer · **Quorum:** met · **Format:** hybrid

Decisions and introductions

TRB-2026-012: Salesforce → introduced, Under Review

Member Experience submitted the Salesforce connector (Lakeflow Connect) to sync Health Cloud and Service Cloud member and case data for a 360-degree member view. TRB is reviewing OAuth scope and PII field mapping to ensure minimum-necessary extraction.

Open questions:
- What is the final OAuth scope for member and case objects, and how does it match minimum-necessary?
- Provide 10-row sample of member records to verify PII extraction boundaries.
- How will Salesforce record deletions cascade to the lakehouse, and what retention period applies?

TRB-2026-017: Lakebase (Postgres OLTP) → introduced, Under Review

Member Experience submitted Lakebase (managed Postgres OLTP) for powering member-facing apps with low-latency serving next to the lakehouse. TRB is reviewing backup/recovery, retention, and PHI-at-rest encryption.

Open questions:
- What is the backup retention policy for Lakebase instances handling PHI, and how is it enforced?
- Does CMK encryption cover Postgres storage at rest, and how is key rotation managed?
- What are the recovery RTO and RPO guarantees for Postgres backups?

TRB-2026-020: AI/BI Genie → introduced, Under Review

Analytics Operations submitted AI/BI Genie (natural-language Q&A) as an umbrella review for analyst self-serve access to PHI. Genie One (TRB-2026-005) is an existing approved use case. TRB is evaluating whether UC row/column masks and filters are proven to hold in Genie-generated SQL.

Open questions:
- Provide test results showing UC row/column masks applied in Genie-generated SQL.
- What prompt injection attacks have been tested and mitigated?
- How is Genie query result cache isolated per user, and what is the TTL?

TRB-2026-022: Model Serving → introduced, Under Review

Research & Innovation submitted Model Serving for deploying trained models as low-latency APIs (e.g., real-time risk scoring on claims). TRB is reviewing network isolation and audit logging before scoring PHI.

Open questions:
- Are Model Serving endpoints restricted to private network access via VPC endpoint?
- What inference request/response data is logged, and where is it stored?
- What are the P50/P99 latency targets for risk-scoring APIs, and are they validated?

TRB-2026-023: AI Functions (SQL) → introduced, Under Review

Analytics Operations submitted AI Functions (SQL) for calling foundation models directly from SQL to classify, extract, and summarize at scale. TRB is reviewing which foundation models are approved for PHI-bearing prompts.

Open questions:
- Which foundation models (Anthropic, OpenAI, etc.) are approved for PHI-bearing prompts?
- What is the no-training-data-retention guarantee from each approved provider?
- What input sanitization is applied to prompts before sending to foundation models?

TRB-2026-024: Clean Rooms → introduced, Under Review

Provider Strategy submitted Clean Rooms for joint analytics with provider networks where neither party exposes raw PHI. TRB is reviewing PHI handling in multi-party outputs and approval workflows.

Open questions:
- What de-identification thresholds and rules apply to Clean Room outputs?
- Provide sample output tables and re-identification risk assessment.
- What is the Clean Room approval workflow, and who must sign off?

Status checks

- TRB-2026-005 Genie One: COND-005-3 in progress, COND-005-4 open; remains Approved with Conditions.
- TRB-2026-034 Serverless compute: conditions COND-034-1..3 not yet closed.
- TRB-2026-009 MCP servers: triage scheduled for the next meeting.
